

Palladio PDA Data Cable

DESCRIPTION

It's easy and simple to surf the Internet with your Mobile Phone and your Palm!

A new way to communicate with your Palm computer(PDA), the GSM and GPRS phones.

Born from the digicom experience in the GSM data communications, Palladio PDA Data Cable is the most convenient solution to connect your PDA (Personal Digital Assistant) to the mobile phone without using the IrDA interface.

Only a few minutes are necessary to setup Palladio PDA Data Cable and connect it to your Palm computer (PDA).

It is available for the most common PDA (Palm, Compaq, Handspring, HP, Sony) and for the most popular mobile phones (Ericsson, Nokia, Motorola and Siemens).

With Palladio PDA Data Cable and the PDA software (or other software) you will be able to easily read the e-mails, surf the Internet and send SMS messages. Furthermore with the software in the Bonus pack you can also write and send SMS and synchronize your agenda.

Palladio PDA Data Cable has been expressly designed to be used with the new GPRS (General Packet Radio Service) mobile phones.

It joins the convenience and advantage of a cable with regards to the IrDA technology and the expensive Bluetooth technology.

With Palladio PDA Data Cable you will be able to connect to the Internet in the modes supported by your mobile phone (Data at 9600 bps V32, V100 and GPRS).

Always on line with your mobile phone and laptop as in your office!

- Adapter for PDA and Mobile Phone
- Connects the PDA to the GSM/GPRS phone
- Available for Palm, Compaq, Handspring, HP, IPAQ, Sony
- GPRS phones supported
- E-mail and Internet
- Send/receive SMS via PDA
- Bonus Pack CD

Palladio PDA Data Cable is composed by two parts: **Palladio PDA Kit** for the connection to your PDA and **Palladio PDA Phone Kit** for the connection to your mobile phone. These two kits are sold separately.
