

Palladio USB GSM

DESCRIPTION

The most innovative solution to connect your laptop (Windows® or Macintosh®) to the mobile phone using the USB port.

Palladio USB GSM is a versatile and powerful GSM modem to be connected to your handset to send and receive data/fax and E-mail through the GSM network.

Palladio USB GSM is powered by the computer USB port and is the right solution for those having no PCMCIA slots or serial ports available on their computer system.

The V.110 protocol allows you to make digital connections to ISDN modems at GSM speed.

Palladio USB GSM operates both with Windows® 98/2000/ME and with MacOS®.

The supported GSM handsets are the following:

Nokia 7110, 6210 (8D0075)

Nokia 5110, 6110, 6130, 6150 (8D0069)
