

The Internet Modem

PALLADIO V.90

*V.90 data fax modem
International line interface (CTR21)
Ideal for high speed Internet access over PSTN
Fax mail
Flash Eprom upgradable*

- ▶ Palladio V.90 is the modem fax for every application that requires ultra high speed and reliability over a remote user analog line.
- ▶ Palladio V.90 offers a complete solution of data, fax, communication for professional, office or home users.
- ▶ One of the most typical application is the Internet access. Palladio V.90 permits to increase considerably the receive data throughput from the ISPs to the remote user.
- ▶ Palladio V.90 uses the V.90 modulation scheme for 56Kbps line speed and the previous ITU-T standards from 33,6Kbps to 2,4Kbps; in any case the modem is able to recognize the ITU-T standard of the other side modem and to select the maximum interoperability speed.
- ▶ Palladio V.90 is the ideal solution for mobile SOHO applications: fax, data and Internet/Intranet access. The modem supports V.80 (H.324) VideoReady standard for the VideoConferencing over PSTN.
- ▶ Users of portable systems often travel abroad and digicom implemented an international line interface which allows to use Palladio V.90 with the telephone networks in different countries.
- ▶ The packages of Palladio V.90 includes all the software and the accessories needed for a correct installation and use.
- ▶ Guaranteed by digicom.

digicom S.p.A. - ITALY - 21010 Cardano al Campo VA via Alessandro Volta 39

Technical Features

- Data/fax modem at 56kbps and 33,6Kbps
- Modulation standard: V.90, V34+, V34, V32bis, V32, V22bis
- H.324/V.80 Videoconferencing support (VideoRedy)
- Fax , mail boxes, message broadcasting
- Send and receive fax: 9600bps (Gr3) and 14.400bps (V.17)
- Error correction according to MNP4-10 and ITU-T V.42
- Error compression according to MNP 5 and ITU-T V.42bis)
- PCMCIA card type II with internal DAA
- Including software for Windows 98/95/NT or MacOS

Windows® version: Code 8D0047

Macintosh® version: Code 8D0048
