

## Usb Link

### DESCRIPTION

***Digicom Usb Link: when the floppy is not enough!  
For files transfer between computers via USB at 8  
Mbps.***

Digicom Usb Link is the fastest way to transfer files between your computers without using floppy disks or Ethernet cards.

Usb Link connects to the USB port of the computer (Windows® and Macintosh®) and in a few seconds you will be able to move files of any size.

The PC-Link program, supplied into the package, allows you to move files and folders by simply dragging and dropping them.

Usb Link transfers any kind of file (PowerPoint presentation, images, etc.) up to 8Mbps.

It's very useful for back-up between PCs and to transfer all your documents from the old to the new PC or to update the files of the laptop and the desktop.

Usb Link can be also used to move files from a PC to a Mac.

Code: 8E4075
