

ATTENTION !

The Digicom SNM31 modem is available in four versions. It's more important read the operative manual present into the box before start the installation.

SNM31 CODE 8D1568: Asynchronous and synchronous V32bis multistandard desk modem.

SNM31R CODE 8D1569: Asynchronous and synchronous V32bis multistandard rack modem.

SNM31F CODE 8D1653: Asynchronous and synchronous VFAST Class multistandard desk modem.

SNM31FR CODE 8D1664: Asynchronous and synchronous VFAST multistandard rack modem.

The operating manual describe all the functionality of the SNM31/SNM31F Digicom Modems. Commands and registers are the same for both modems. Regarding the functionality of the Vfast Modems, please refears to the appendix M: Vfast functionality.

PRECAUTIONS

The following installation rules should be respected in order to have the best working order of the equipment and for the user's safety.

ENVIROMENTAL CONDITIONS:

**ENVIROMENTAL
TEMPERATURE**
from 5 to + 35°C

**RELATIVE
HUMIDITY**
from 20 to 80 % n.c.

Every rapid change of temperature and humidity should be avoided (0,03°C/min).

This system, including cables, should be installed in an area without or distant from:

- Dust, humidity, heat from direct sun light.
- Objects which irradiate heat. These could cause damages to the container or other problems.
- Objects which produce a strong electromagnetic field (loudspeakers, etc.)
- Liquids or chemical corrosive substances.

GENERAL WARNINGS

For all equipment powered directly from the network.

POWER SUPPLY 220-240 Volt monophase 50 Hz

FUSES	} only those indicated on the equipments label
ISOLATION CLASSIFICATIONS	
NOMINAL CURRENTS	

To avoid electric shocks, the equipment should never be opened. Ask qualified personnels help.

When testing or changing fuses, always remove the cable from the power plug.

Disconnect the power cable from the wall plug when the terminal is at a stand still for a long period. To disconnect the cable pull it by the plug, never pull it by the cable itself.

If there should be a liquid or object penetration in the equipment, disconnect the power cable and call qualified personnel for testing.

CAUTION

This equipment has a lithium battery to store the configuration. Warning danger if the battery is not changed correctly. The battery must be changed by authorized personnel and must be the same as the previous one (mod.Duracell 2032).

CLEANING THE TERMINAL

Use a clean and soft cloth. Wet the cloth with water or natural detergent if it is necessary to remove eventual stains.

Never use chemical products such as petrol or solvents.

VIBRATIONS OR CRASHES

Caution against vibrations and crashes.

PREFACE

Thank you for appreciating Digicom technology. You have bought an extremely sophisticated and flexible modem suitable for a wide range of applications.

Careful reading of this introduction is strongly recommended in order to be able to take advantage of the many features and functions of this product and to establish modem configurations for specific applications.

Any objection will be well accepted as they are considered useful for our professional growth and, indirectly, innovative for the final user.
