Michelangelo USB CX

DESCRIPTION

The external ADSL modem for the USB port.

The ADSL and USB technologies togheter to get the maximum performance.

Michelangelo USB CX is an ADSL modem up to 8Mbps to be connected to the USB port of your computer.
Using the ADSL accouts (640Kbps), supplied by the Internet Providers, you will be able to surf the Internet 10 times faster than connecting with an ISDN or an analog modem.

With the ADSL modems you will be always on-line: the Internet connection is active and the telephone line is always free to send/receive faxes and calls.

You will be able to download images, video, audio files in a few seconds, saving money on the telephone bill as the subscriber's fee doesn't depend on the connection time and on the data traffic.

Thanks to the Windows® Plug & Play function and to the setup utility, supplied into the package, Michelangelo USB CX is very easy to install and setup. It is powered by th USB port.

It is supplied with the drivers for Windows® XP, 2000, ME, 98SE and it is software upgradable.
