

Tintoretto USB

DESCRIPTION

The ideal solution to connect an ISDN modem through the USB port.

Tintoretto USB is an active ISDN modem able to operate over ISDN lines, to be connected to the computer USB port.

In a few seconds it connects to the Internet over digital ISDN lines at 128/64 Kbps using standard protocols like V.110, V.120, V.42bis, PPP and MLPPP to guarantee the maximum compatibility.

Tintoretto USB is selfpowered by the computer USB port and no external power supply is needed. It is very easy to install as it supports the Windows® Plug&Play technology.

Tintoretto USB is Flash upgradable to be always updated.

It is supplied with Software, ISDN cable, USB cable and drivers for Windows® 98, 2000, ME. Macintosh® version is available too.
