Michelangelo PCI

DESCRIPTION

The most convenient and cheapest solution to get the ADSL speed on your PC.

Michelangelo PCI will surf the Internet at a supersonic speed: 10 times faster than a V.90 analog modem and an ISDN modem.
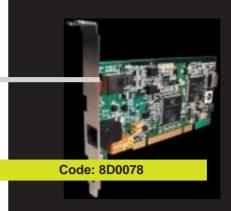

Using the ADSL accouts (640Kbps), supplied by the Internet Providers, you will be able to surf the Internet 10 times faster than connecting with an ISDN or analog modem.

With the ADSL modems you will be always on-line: the Internet connection is active and the telephone line always free for faxes and calls.

You will be able to download images, video, audio files in a few seconds.The subscriber's fee doesn't depend on connection time and on data traffic.

Thanks to the Windows® Plug & Play function and to the setup utility, supplied into the package, Michelangelo PCI is very easy to install and setup.

It is complete with drivers for Windows® XP/2000/ME/98.

Code: 8D0078

- **ADSL modem for PCI Bus up to 8Mbps**
- **Asymmetric data speed**
- **Downstream up to 8Mbps**
- **Upstream up to 1Mbps**
- **8 Mbps full rate ADSL support**
- **1.5 Mbps G.Lite ADSL support**
- **32 Bit PCI Bus**
- **PC interface: PCI compliant with 2.2 specifications**
- **ADSL interface: RJ11 connector**
- **ADSL standards:**
  - ANSI T1.413
  - ITU G.992.1 (G.dmt)
- **Supported Protocols:**
  - RFC 1483 (Bridge/Routed Ethernet over ATM)
  - RFC 2364 (PPP over ATM)
  - RFC 2516 (PPP over Ethernet)
- **Plug&Play Windows®**
- **Software upgradable**
- **CE mark**
- **Driver for Windows® XP/2000/ME/98**

The maximum performance with the latest xDSL technologies up to 8 Mbps. Solutions for point-to-point (HSDL) and Internet (ADSL) applications.
