Printer Server

Code: 8D5485

DESCRIPTION

Save your hardware investments!

Small dimensions and very easy to install. Printer Server 10/100 transforms your laser or inkjet printer into a powerful network printer that can be used by every LAN user.

Your Lan has Windows® and Macintosh® computers? Also Unix or Linux stations?
No problem, Printer Server can operate with all these platforms, even simultaneously.

Thanks to the 10/100Mbps Lan port, Printer Server is suitable for any type of network.

The setup is carried out via Browser or through proper management utilities supplied with the product.
If using HP® printers, it is possible to manage the digicom Printer Server through the JetAdmin® program.

Digicom Printer Server offers the Internet Printing functionality that allows to read and automatically print the received e-mails.

Printer Server support the Appletalk, IPX/SPX, NetBeui, TCP/IP and SNM protocols and it can also operate as a DHCP server.

- **10/100 Mbps Autosensing Half/Full Duplex LAN port**
- **Bidirectional parallel port**
- **3 ports for logical printer supported**
- **Supported platforms: Windows® 3.11/95/ 98/NT/2000/ME, Macintosh®, Unix**
- **Supported protocols: TCP/IP, IPX/SPX, AppleTalk, SMB over NetBEUI, SNMP, Windows® Peer-to-Peer**
- **Browser setup or software utility**
- **Marcatura CE**
